MindCare: AI-Powered Student Support

How Offline AI Helps Students Manage Stress

Introducing MindCare

AI-Powered Support for Students

Helps manage stress, anxiety, and exam pressure

Instant, Practical Coping Suggestions

Delivers actionable advice without long conversations

Works Offline for Immediate Help

No internet required for emotional support

The Student Stress Challenge

Students Face Intense Academic Pressure

Common struggles: stress, anxiety, low motivation

Current Solutions Fall Short

Often require internet or involve lengthy conversations

Need for Immediate, Practical Support

Students want quick, actionable coping strategies

How MindCare Works

Offline ML Model Processes Input

User messages are analyzed locally for privacy and speed.

Emotion Detection with Confidence

Model predicts emotion and assigns a confidence score.

Instant, Actionable Suggestions

Provides direct coping tips without lengthy chats.

AI and Safety at the Core

Offline AI Model for Emotion Detection

Custom-trained ML model classifies user emotions instantly

Empathy and Actionable Support

Each emotion triggers empathetic response and practical tips

Immediate Crisis Safety Measures

High-risk inputs prompt instant crisis guidance for user safety

System Design Overview

User-Friendly Chat Interface

Simple design for quick student access

Backend Powered by Node.js

Connects frontend to local ML model seamlessly

Fully Offline Operation

No reliance on external APIs or internet

Current Limitations and Next Steps

Current Limitations

- Small dataset restricts emotion recognition
- Limited range of emotional categories

Planned Improvements

- Expand dataset to 1000+ samples
- Increase emotion categories to around 20
- Enhance prediction accuracy

Safety and Suggestions

- Add keyword-based safety overrides
- Refine emotion-to-suggestion mapping

Key Takeaways

Instant, Offline Student Support

Delivers immediate help without internet access

Custom AI for Emotional Guidance

Trained model detects emotions and suggests coping steps

Safe, Practical, and Accessible

Crisis handling and actionable advice ensure user safety

Thank You!
